Milwaukee 3701-21T

M18™ Rotary Laser Level Kit w/ Tripod & Rod

Item Number: MI-370121T

Our M18™ Red Exterior Rotary Laser Level Kit w/ Receiver features impact protection and a simplified setup. Designed for harsh jobsite conditions, we ensure your laser is protected, withstanding up to a 1.5M drop and a 2M Tripod tip. Getting started with this laser is easy thanks to its simple, one-button setup. Featuring built-in manual masking shutters, you're now able to block the laser in any desired direction, preventing interference with other lasers on site. The Receiver will detect the laser up to 2000 ft (Diameter) and has built-in strobe light protection, reducing interference and downtime on the jobsite. The included Rotary Laser Tripod is made with a durable aluminum design that withstands more impacts and tips on the jobsite. The ultimate tool for accurate results for any leveling on any jobsite. The M18™ Red Exterior Rotary Laser is a part of the M18™ System, fully compatible with over 200+ solutions.
