Milwaukee MXF512-2XC

MX FUEL™ Pipe Threading Machine

Item Number: MI-MXF5122XC

Our MX FUEL™ Pipe Threading Machine is the industry's first cordless threading machine, designed to make your workflow easier and more productive. Powered by MX FUEL™ REDLITHIUM™ batteries, the machine eliminates the need to work near an outlet, allowing you to work anywhere – set up wherever it's most convenient, and even in places that aren't possible with other threading machines. Combined with a spring-assisted cart for easiest transportation and set up, plus a self-contained oil reservoir to keep oil off the ground. The MX FUEL™ Pipe Threading Machine allows you to easily move with your work, eliminating wasted time walking back and forth on the jobsite. For jobs requiring threading and grooving, the machine's second hammer chuck enables the connection of roll grooving attachments without requiring any teardown or additional adapters, saving set-up time during every changeover. The Milwaukee® NPT Pipe Threading Die Head w/Micro-Adjust not only automatically releases for each thread, but the Micro-Adjust knob enables the easiest, most controlled die adjustments for consistent quality threads over time. The MX FUEL™ REDLITIUM™ XC406 battery pack delivers up to (140) ¾" cut, ream, and threads per charge, providing the runtime to work all day, and the power to thread up to 2" black iron pipe, stainless steel, rigid metal conduit (RMC) and more. Once the job is complete, the machine can be stored vertically upright without spilling, reducing the storage footprint. The threader is compatible with ONE-KEY™ Technology that wirelessly connects to a smartphone to track the tool's location, manage it in inventory, and lock the tool out for added

security and protection to your investment.

Features

- Up to (140) ¾” Threads Per Charge
- Threads up to 2” pipes
- Threads several materials including black iron pipe, stainless steel, rigid metal conduit (RMC) and more
- Compatible with most roll grooving tools
- Self contained oil reservoir reduces mess
- Durable spring assisted cart allows for easy transportation and set up around the jobsite
- Additional rear hammer chuck enables fast transitions between threading and grooving
- Durable all metal housing construction
- Micro-Adjust enables the easiest, most controlled die adjustments for consistent quality threads
- ONE-KEY™ technology allows for tracking, tool security, and inventory management
- POWERSTATE™ brushless motor provides more power, more run-time, and longer life
- REDLINK PLUS™ intelligence enables advanced communication between batteries and tools for unmatched performance, protection, and productivity.

Specifications

Weight (LBS)	240 LBS
Capacity	1/8" - 2"
Warranty	2 years
