
Patron SC-CP1

Condensate Pump for 1/1.5 Ton Spot Coolers

Item Number: PA-SCCP1

The optional Condensate Pump Kit replaces the standard collection bucket, allowing condensate to be automatically pumped to a drain or outdoors for continuous operation. Designed for quick, straightforward installation, it includes all required tubing and hardware and connects to the unit via a single plug connection. Compatible with the SC-100 and SC-150 spot cooler models, it helps minimize maintenance and downtime.

Specifications
