Patron SP-50H

3" Submersible High Head Pump, 220V

Item Number: PA-SP50H

The SP-50 is a heavy-duty 3 HP submersible pump designed for demanding jobsite dewatering where reliability and versatility matter. Available in high-head or high-flow configurations, it is built to handle abrasive water and tough conditions while remaining easy to transport and service. A rugged construction and long-life internal components make it well suited for rental fleets, construction sites, and industrial applications.

Features

- Dual-handle design with eyelet for improved mobility
- Oversized handles for use with work gloves
- High head and high flow models available
- Models can be interchanged with impeller & plate swap
- Capable of handling abrasive materials
- High chrome, semi vortex impeller (3-10X lifespan)
- Cast iron pump casing and suction plate
- Lightweight aluminum body

- Stability legs on side of unit for horizontal storage

Specifications

Discharge Size	3" NPT
Horsepower	3 HP
Voltage (V)	220V 1PH
Amperage (A)	13 A
Cable Length	33-ft
Max Head	85-ft
Max Flow (GPM)	140 GPM
Width	11.15"
Height	23.1"
Continuous Running Water Level	4.9"
Weight (LBS)	84 LBS
Free Passage	5/16"
Warranty	1 Year
Certification	CSA
