

Patron FP100

Forward Plate Compactor, 20", 210 LBS, Honda

Item Number: PC-FP100

The Patron FP100 is the larger brother to the FP75, utilizing the same proven Honda GX160 engine to efficiently compact aggregate; including asphalt, gravel, sand, and silt. Where the unit differs is in the size of the bottom plate. The added width and additional weight on the FP100 give this unit a significant uptick in compaction force. Water tank and wheel kit are also available.

Features

- Sealed bearings make this unit oil-free, resulting in zero eccentric maintenance
- Lifting hook
- Stowable handle
- Optional wheel kit (sold separately)
- Optional water tank for asphalt (sold separately)

Specifications
